Maybe even better than free.

You don't need any special software installed to be able to download your files. File is free to use with no gotchas and no hidden fees. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Simply upload your file and share the link. It is also allowed to link to the download page from websites and communities. We have no file size limit. Our service is completely free for everyone. The cost of that data transfer is covered by your internet service or the data plan on your phone. No account or credit card is required to get started. Unfortunately, we can't make that part free. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. Keep your files private, or send your download links only to friends or family. Just upload the file you want to share with your friends and we send you a download link to your file. If only we could, we surely would! On the other hand, using file can actually save you money. Alternatively you can choose to share your download links on blogs, forums and social networking sites.
