Image: Getty Images/iStockphoto You need to make make or answer a phone call, but your mobile phone isn't within arm's reach. No problem-if you're in front of your Windows 10 computer and have an Android device. You can make and receive calls meant for your phone through your Windows 10 computer; the trick lies in setting up your phone and then using Microsoft's Your Phone app to enable the calling option. Sorry, iPhone users, this trick won't work for you. But if you own an Android phone, the steps aren't too difficult. For this to work, your PC will need the Windows 10 May 2019 Update, aka Windows version 1903, or higher. Your PC must also have Bluetooth. And your Android phone must be running Android 7.0 or higher. SEE: 20 pro tips to make Windows 10 work the way you want (free PDF) (TechRepublic) If your phone is not already linked in Windows 10, linking it is your first step. Go to Settings and then Phone. If your phone isn't linked, click the button to Add A Phone. At the next screen, choose your type of phone—Android or iPhone—and click Continue. Again, the calling feature works only with Android (Figure A). Figure A On your Android phone, go to the Google Play store and install Microsoft's Your Phone Companion app. Open the app and sign in with your Microsoft Account if requested. Grant the necessary permissions by tapping Allow for each prompt. If you would like the Your Phone Companion app to be always available, tap Allow when asked if you want the app to always run in the background (Figure B). Figure B Back at your PC, check the box that says Yes, I Finished Installing Your Phone Companion App. Click the button to Open QR code. On your Android phone, tap Allow to allow the connection with your PC and then tap Done. You should see a screen indicating that your phone and PC are linked (Figure C). Figure C On your PC, the Your Phone app is already open, as that's what you're using to set up the connection. If you don't see it, click the Start button and open the app from the Your Phone shortcut. At the window for the Your Phone app, click the Settings icon at the bottom of the left sidebar. Scroll down the Settings screen to the Calls section and turn on the switch to Allow This App To Make And Manage Calls From My Phone (Figure D). Figure D From the Your Phone app on your PC, click the icon on the left sidebar for Calls. Click the Set Up button. On your phone, tap Allow when asked to make your phone visible to other Bluetooth devices. You'll then be asked to confirm the PIN displayed on your PC and phone. Click Yes on your PC and tap Pair on your phone (Figure E). If Focus Assist is turned on, you'll receive a notification asking you to turn it off to allow for phone calls. Figure E Now let's say you want to make a call. At the dialpad screen in the Your Phone app on your PC, type the number you wish to dial or start typing the first or last name of the contact you want to call. Then click the phone icon below the dialpad (Figure F). You can then conduct the phone call through your computer and click the Hang Up icon when you're finished. Figure F To be able to answer an incoming call, make sure the Your Phone app is running. Click the Accept button in the notification to pick up the call (Figure G). Click the Hang Up icon when you're done. Figure G Microsoft If your computer runs Windows 10 and you also have an Android phone, you should probably be using Microsoft's Your Phone app. You can do a lot with it, including making and receiving phone calls on your PC. Let's do it! What You'll Need The Your Phone app is preinstalled on Windows 10 PCs. When connected to an Android device, it can mirror your notifications, sync photos, and send text messages. You can also use the app to place and receive calls from your phone through your PC. To make phone calls using the Your Phone app, your devices must meet the following requirements: Your computer must be running Windows 10 with the May 2019 Update or later, and have Bluetooth enabled. Your Android device must be running Android 7.0 or above. Before attempting to use the phone call feature, you'll have to follow the initial setup process for Your Phone on your PC and Android device. RELATED: Why Android Users Need Windows 10's "Your Phone" App How to Make Android Phone Calls From Windows During the initial setup process of the Your Phone Companion app on your Android device, there are a few permissions you have to grant for the phone call feature. First, tap "Allow" to grant the app permission to make and manage phone calls. You also have to grant it access to your contacts so you can access them on your PC. It's also important that you allow the Android app to run in the background. This ensures a stable connection between your phone and PC. After the setup process is complete on your Android device, you can move to the Windows app to finish setting up the phone call feature. First, navigate to the "Calls" tab, and then click "Get Started." A pop-up containing a Bluetooth PIN will appear on your PC. A pop-up containing the same PIN should also appear on your Android device. Make sure the codes match, and then click "Yes" on your PC and tap "Pair" on your Android device. It's possible to use the feature immediately, but you'll only be able to dial numbers. To show your call log, you have to grant permission on your phone; click "Send Permission" to proceed. A notification will appear on your Android device; tap "Open" to launch the permission dialog. Tap "Allow" in the permission pop-up. If you don't see a pop-up, you can manually grant permission. To do so, go to Settings > Apps & Notifications > See All Apps > Your Phone Companion > Permissions, and then select "Allow" under "Call Logs Access for This App." Your recent calls will now show up in the Your Phone app on Windows 10. To make a call from your PC, you can select a recent call and click the phone icon, search for contacts, or use the dial pad. When you receive a phone call, a notification will appear on your PC, and you can click "Accept" or "Decline." That's all there is to it! You can now make and receive phone calls from your PC—no video call or third-party service required. Smartphones are addictive but at times, you just want to enjoy the phone's content from a big screen. Luckily, Microsoft has bridged the gap as it offers an intuitive way to receive and make a phone call on PC. In addition, we will also talk about a perfect third-party software that gives you more control over controlling calls from a desktop. Stick to reading to learn more about the impeccable features of our surprise desktop program. The answer is Yes. Microsoft has rolled out a long-awaited feature that helps you make and answer phone calls right from the comfort of your PC. Now, you don't need to stop doing anything on your computer just to take a call on the smaller display. To call on PC, it should be running on Windows 10 version 1803 or higher while the Android phone should be on Android version 7.0 or higher. When these requirements are met, you can easily use my PC to control phone calls. Many users also ask, can you call on Instagram PC? Yes, you can control Instagram calls from PC after connecting your Android phone and PC via a built-in "Your Phone" app. Setting your Windows PC up for getting your phone calls isn't difficult at all. Check out the below steps for how to call on Instagram on PC: Step 1. First of all, launch "Your Phone" app on your PC. Step 2. Now, tap Android on the left tab and hit Continue to get started. Step 3. Enter your phone's number that you want to control and hit Send to get a link on your Android phone. Step 4. Open this link from Messages to get to the app in the Google Play Store. Install and launch it (if it's not already installed). Step 5. Fill in your Microsoft account's information on the app and tap "Sign in" to get going. Step 6. Then, tap Allow to give permission to the app to connect to your PC. Step 7. Now, go to Windows 10 and head to "Phone Call" settings to allow Your Phone app to make calls. After that, you can start making calls from your PC without any interruption. Make sure both devices are using the same Wi-Fi network. However, you may have already got to know that this process is quite tech-savvy and takes a lot of time. For this reason, most users rely on powerful third-party apps to call numbers on PC in a rather intuitive and simple way. The internet is awash with tools that allow you to control phone calls from a PC but AirDroid Personal stands out as the best among them. Having millions of satisfied users, this program offers a range of impeccable remote features to control and manage your smartphone wirelessly. Its "Dialpad" feature makes it extremely easy to control all your phone calls from a big screen. After connecting both devices, you can simply dial a number and initiate a call in just a few seconds. What's more, it lets you import dozens of contacts into the app for future use. On top of that, you can initiate auto-dial the contacts in sequence. With all these stellar functions, AirDroid Personal brings the long-awaited convenience of making bulk calls while working on your PC. Additionally, it doesn't require you any technical knowledge to get started thanks to its modern and clean interface. Key features and Pros Below qualities justify why AirDroid Personal is a go-to choice for millions of users: An intuitive "Dialpad" feature to make phone calls from PC instantly. Users can easily dial the call number on Dialpad and start calling without even checking the phone. Lets you import tons of contacts into the app and manage them easily. It also auto-dials your call numbers in a sequence which comes in handy while making a bulk of calls – a feature known as Queued Dialing. You can set the time of Call interval as well as view and manage the Android Call log from PC. Users can transfer files across all platforms including Windows, Mac, Android, and iOS. Screen recording for tutorials or how-to guides. It allows you to mirror your phone's screen on the big screen. An easy way to control all the SMS and other notifications from your desktop. Pros: Very easy to install and use. Comes in multiple pricing plans. Offers a free customer support service. The most powerful trait of AirDroid Personal is its ease-of-use. Even first-time users don't face any difficulty in exploring its amazing features. Check out how to call people on PC: Step 1. To begin, install and launch AirDroid Personal Desktop Client on your PC. Sign in with your AirDroid account. Step 2. Also, install AirDroid Personal App and login with the same account. Step 3. On the Desktop client, connect to your mobile client under "My Devices." Step 4. If asked, give permission to the app for making calls. For that, launch Mobile app and go to Me > Security & Remote Features, and enable the "Contacts" option. Step 5. Once the devices are connected, go to Desktop Client and hit File Transfer on the left bar. Step 6. Then, choose the connected device and hit "Dialpad." Now, enter the phone number and start making calls. Here is another popular app to manage your phone calls from a big screen. 1. Remote Phone Call This powerful app makes it quite simple to integrate your Android phone to Windows PC and manage calls using Wi-Fi or Bluetooth. Consider it as a basic remote control app that also allow you to manage contacts, view logs, and read and write text messages. Features: Make calls from computer. Provides hotkey for dialing numbers from the clipboard. Users can control audio settings. Manage SMS messages. Show connection status. Auto-start with Wi-Fi or Bluetooth at Windows login. Quite expensive. Audio quality is not so satisfactory. Interface seems outdated. Now that you know the key features, pros, and cons of three popular remote apps, it's time to decide which software is best for you. A few factors should be considered while making a choice, including available features, user-friendliness, and price. Based on user feedback and our own research, AirDroid Personal is head and shoulders above than the other two. It offers a number of advanced remote control features such as intuitive Dialpad, Queued dialing, auto-dialing, and import contacts. Also, it is the cheapest app for the features it offers. These traits make it our top-pick to make a phone call on PC. The below table will further make it clear to you. App: Ease of Use: Compatibility: Price: User ratings: AirDroid Personal: Very easy to use: On all Android and Windows PCs: \$2.50/month for yearly subscription: 4.9/5: Your Phone: Long and tiring process: Very limited compatibility: Free: 3.5/5: Remote Phone Call: Lengthy procedure: Works on a few devices: \$5.993.9/5: Hopefully, you won't find any trouble in how to call on PC seamlessly. All the three tools we discussed in this guide are efficient and user-friendly and you can rely on any of them to manage your phone calls from the big screen. AirDroid Personal is your perfect option to get the best user experience coupled with a plethora of spectacular remote control features. However, the final choice is yours to make. Read the below commonly-asked queries of readers regarding how to call UNO on PC: How to do video call on PC: If you want to make a video call from PC, then use a third-party app like Zoom. Also, ask your colleagues, friends, or family members to login to the same app to begin the call. How to call on Instagram on PC: Want to make an Instagram call on PC, then use a competent Android Emulator like BlueStacks. All you need to do is install this app on your computer, search and install Instagram from its Play Store, login with your account, and make a call just as you would do from a mobile device. How to make WhatsApp call on PC: Using your PC to make or receive WhatsApp call is a straightforward task using BlueStacks. Check out how to do that: Install BlueStacks: From its Play Store, install and launch WhatsApp: Login with your account: Make a call to any of your contacts: Can you use PC to control phone? Yes, there're tons of third-party desktop remote control software that let you control a smartphone from a PC. Based on users' feedback, we strongly recommend you to get AirDroid Personal to get the best user experience. After connecting your phone and PC, it offers an intuitive way to manage every aspect of your smartphone via mouse and keyboard.
