I am using the Yaesu ATAS120A screwdriver antenna and have added the Yaesu MH59A8J remote microphone. This is a very hot mic, so you will need to perform the ALC adjustment on HF and adjust the mic gain for AM and FM after installing it. But the audio punch I get with this mic is amazing. I get so many unsolicited comments about how nice the audio is. I love the performance of this rig. The settings might be a good starting point for someone who just got this rig, but please keep in mind that these settings are for my voice, with the ATAS120A antenna, and using the MH59A8J microphone.
